

VoIP Networking Is Easy With CyberData

Expanding a single network drop into two separate connections is easy with CyberData's networking devices. This can be helpful for adding a VoIP phone to a cubical or workspace with a PC connected to a single network drop.

Expand a network drop into two separate connections!

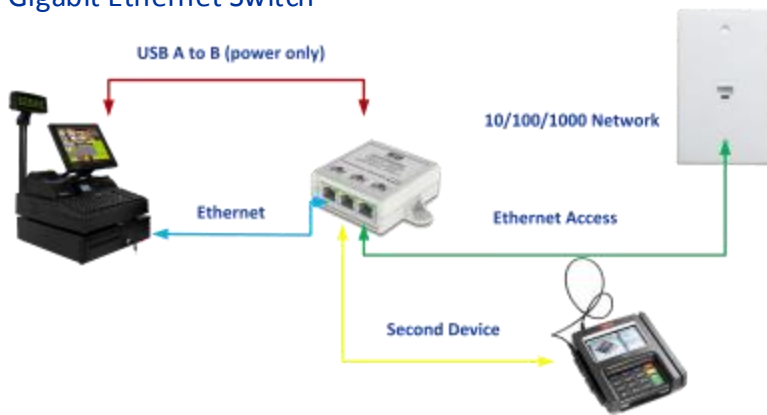

3-Port PoE Powered Switch

011187 3-Port PoE Powered Switch
No separate power supply needed!

PC users can split a single Gigabit Ethernet port into two Gigabit Ethernet ports

3-Port Gigabit Ethernet Switch

011236 3-Port Gigabit Ethernet Switch
Gets power from your PC's USB Port!

Monitor network traffic for diagnostic purposes

3-Port USB Gigabit Port Mirroring Switch

011259 3-Port USB Gigabit Port Mirroring Switch

Perfect for engineers, programmers and field service personnel

Monitor for diagnostics purposes while maintaining a PoE connection to attached device

2-Port PoE Gigabit Port Mirroring Switch
