Only pick up motion that matters

Virtually eliminate false motion alarms! Speco's analytic cameras and recorders with human detection can notify you of people in the scene and ignore everything else such as animals and precipitation. Alarms can be triggered if people enter view or a pre-defined region. Alarms can also be tailored to trigger upon entrance or upon exit of region.

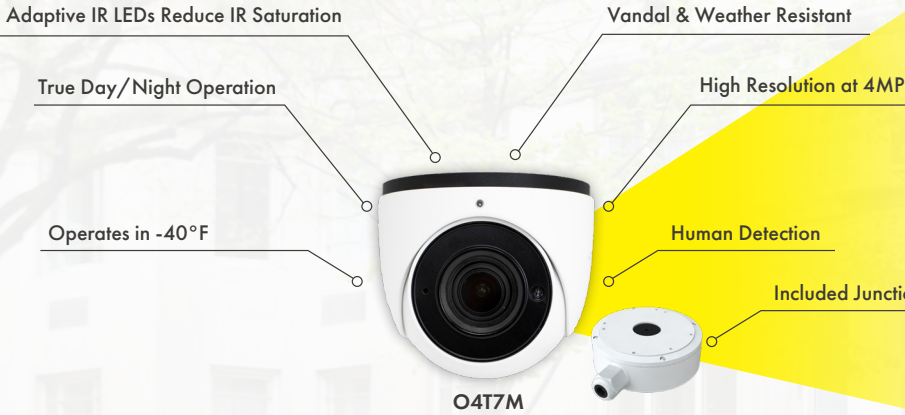

Also available as patented Wall Mount recorder

speco technologies  
Giving You More.

## Max capacity reached

Line Crossing has the ability to maintain counts of people and/or vehicles. Alarms can also be triggered on excessive counts to control crowd density, which is an important feature, especially in today's climate with COVID-19. Regulations have been imposed upon businesses to maintain social distancing guidelines, most notably with grocery stores and restaurants. Line crossing analytics will assist any business to follow through with this requirement.

Also available as desktop recorder

Find the face in the crowd

With Facial Recognition an alarm can be triggered if a face is detected in a designated area. This limits false alarms as it will only trigger an alarm on a face. Alarms can also be triggered on specific faces, or recognized vs. unrecognized faces. This game-changing feature is extremely useful in any application; particularly in schools and day care facilities. Having the ability of being alerted when a stranger has entered the premises is a tremendous solution that can not only provide elite security, but peace of mind.

Also available as patented Wall Mount

FACIAL RECOGNITION FOR THE MASSES

BE NOTIFIED OF TRESPASSERS

Facial Recognition **Captures, Recognizes, and Stores** faces and you can **Search** by face during playback. Sends real time alerts when there is a friendly or unfriendly face in view. It's a self-contained system (camera & recorder) with no licenses or monthly fees.

5 YEAR WARRANTY

## Contactless entry made easy

The O2TML is a contactless solution designed to screen for masks, temperature and face detection. It is equipped with an 8 inch LCD screen, dual lens camera, and an infrared sensor. The O2TML can recognize faces with a mask, will detect when a maskless face is presented and will trigger a voice alarm when an abnormal temperature is detected. It supports remote live view and two-way audio and is equipped with a Wiegand input/output that can be used in conjunction with access control.

Opening new doors for opportunity

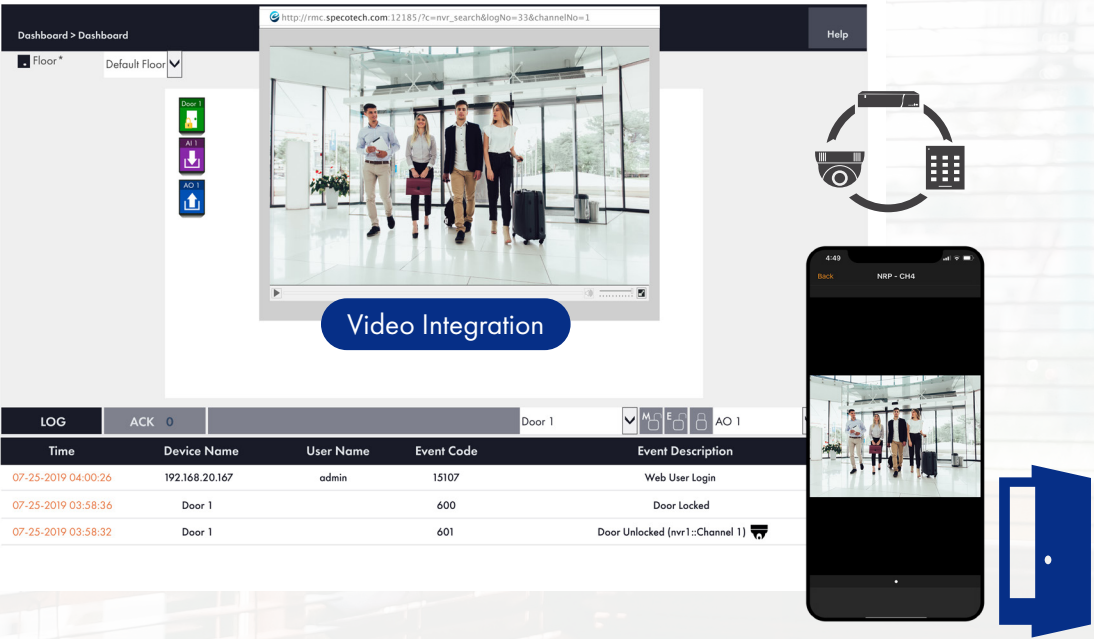

Speco Access is an embedded browser managed access control system that's an affordable, feature rich and scalable solution. There's no software to be installed, and easily integrates with any of our NR Series recorders. As an out of the box ready integrated system our dealers now can provide value leading capabilities not presently available without a premium investment. Most importantly it is a secure, self-contained system designed to enhance profitability of small and midsize applications.

ACCESS CONTROL

THE ULTIMATE SCREENING SOLUTION
