

**\$350/hour\***

\*average cost to reboot a locked remote device

RPM1581HVN 8-port Remote Power Manager

Save time and cut costs: **reboot devices from your phone** with an RPM

## The average remote location reboot call costs \$500; how much is your time worth?

Sending a technician to flip a power switch is a pain. It wastes resources, time, and can put vital equipment in the hands of untrained personnel. Minuteman's lineup of **Remote Power Manager ip-addressable PDU products** has been a popular time-saving solution for IT, Security, and Telecom managers for years, and the four newest additions to the line are sure to become new favorites.

The new RPMs are available in 8-port (1U/0U) and 16-port (0U) configurations, and are accessible via web browser from a single secure IP address. The RPM allows administrators to monitor, control, and configure power to up to 16 devices from a **PC, smartphone, or tablet**, ensuring that a locked up remote device no longer means a wasted afternoon or evening.

### NEW! 120 & 208V RPM 8 & 16-port

- **Control power to 120 and 208-Volt devices** from a PC, Smartphone, or tablet, from anywhere with an internet connection  
*Accessible via any web browser - no special apps or software required*
- **Rack-mountable** horizontal/vertical (1U/0U) or vertical-only (0U)
- **LCD Amp-meter display** for real-time true RMS load monitoring
- **NEMA 5-15/20R (120V) or IEC320 (208V) Receptacles**
- **Automatic Notification** of problems via SNMP trap, email, or audible alarm
- **UL60950-1 Approved**

Model	Crts	Voltage	Receptacles	Amps	Format
RPM1581HVN	8	120V	5-15/20R	15A	1U/0U
RPM20161VN	16	120V	5-15/20R	20A	0U
RPM2082HVI	8	208V	IEC320	20A	1U/0U
RPM20162VI	16	208V	IEC320	20A	0U

RPM20162VI

### Intuitive Control - No Special Apps Required!

- **Monitor RPM information in Real Time**  
View combined current draw & warning thresholds
- **Control Connected Devices**  
Control individual outlets & group outlets to control multiple devices together
- **Event Scheduling & Ping Actions**  
Schedule power on, off, & reboots at set times or events; detect lockups with auto ping feature
- **Configure from Anywhere**  
Access all settings from any device for total versatility
- **Secure SSL Connection**  
SSL security ensures a safe connection to your devices
- **Enterprise Mgr. Included**  
Control multiple RPMs from a single interface
