

## Dual Battery Back-Up System for eMG80/800 and Vertical Summit Products

### EMG BB2U-24/20

Designed for longer run time than a UPS system can provide. The PM Power Products EMG BB2U-24/20 battery back-up system can supply up to 3 hours of operation after a power failure for the EMG 80/800. Designed to plug into the system, the batteries are continuously charged by the system. In the event of power loss, the batteries seamlessly supply power to run the system until power is restored.

Compact 2U rack mounting can also serve as the mounting system for the eMG-80 saving the cost of a rack mount. The eMG800 can be mounted above or below the eMG800 BB2U-24/20 for ease of installation. Optionally, the EMG BB2U-24/20 can be used as a mounting shelf for the eMG80, saving the cost of a rack mount shelf. Supports the Vertical Summit products too.

Protection is provided by a 10 amp in-line fuse the EMG BB2U-24/20 provides the longest run time in a cost effective compact package.

The EMG BB2U-24/20 is protected by a one-year warranty. The EMG BB2U-24/20 allows for easy battery changes in the future if needed. The system power cable routes out the back to the EMG system 24 VDC connector. The locking unit weight is 36 lbs., dimensions are 19" wide, 3.5" high and 13" deep. Includes (4) 10-32 and (4) 12-24 rack screws.
