Call Reporting & Business Productivity Dashboard

CallAnalyst™ is an award-winning call accounting solution that enables businesses of all sizes to manage their telephone systems and related infrastructures more efficiently and cost effectively. The solution addresses the three main functional areas of voice communications management — Call Reporting, Billing and Trunk Analysis. CallAnalyst allows users to monitor and manage multiple phone systems whether they are TDM or IP-based in a networked environment.

Call Accounting

The CallAnalyst call accounting system collects and processes Call Detail Records (CDR) to produce powerful historical drill-down reports to help manage costs and improve business productivity.

The call accounting engine provides:

- Summary Reports and Detailed reports
- Extension-level call details
- Department allocation of phone bills
- Trending and forecasting of trunk usage
- Trunk, tariff and traffic reports

The efficient and effective use of phone system resources, such as PBXs and key systems, helps businesses reduce costs and achieve faster ROIs. CallAnalyst provides the tools necessary to help businesses reach these goals and gain a clear picture of exactly how their phone system is being used.

Features

- Call Reporting
- Quality Monitoring
- Performance Management
- Call Costing
- Automate Bill-Back
- CallAlert! and Fraud Alert
- Traffic Analysis & Capacity Management
- Marketing Campaign Tracking
- Rate Tables
- Report Automation
- Network Ability

Benefits

- Cut Costs
- Track Employee Productivity
- Increase Business Productivity
- Optimize Resources (Infrastructure and Staff)
- Optimize Marketing Budgets
- Enhance Security
- Improve Customer Service

CallAnalyst Modules

Traffic Analysis

Campaign Manager

Time Billing & Client Matters

provide a consolidated bill.

information of the caller.

The Traffic Analysis module helps businesses understand trunk traffic to optimize trunk capacity. This tool also helps businesses forecast trunk capacity based on historic call volumes. The module provides quick ROI to businesses that are over trunked and paying monthly carrier bills for unused trunks. It also helps businesses ensure they are not under-trunked, resulting in customers getting a busy signal.

Campaign Manager helps businesses track and optimize

advertising budgets using the DID/DNIS Manager. With

businesses bill customers back on the time spent on the

phone. The tool also provides flexibility to associate

multiple projects and cases to a client in order to

E9-1-1 Onsite Notifications & PS/ALI Database

CallAnalyst provides an interface for IT managers to manage the Automatic Location Identification (ALI) database in NENA format that is widely accepted by the

PSAPs. Call Analyst also provides real-time* onsite notification of 9-1-1 calls with the detailed location

this tool, businesses have the ability to associate

advertised DID/DNIS numbers to specific campaign

names in order to pull meaningful reports, thereby

making overall marketing decision making easier.

The Time Billing & Client Matters module helps
