Call Tracker

4 or 8 Line Stand-Alone or Networked Call Recorder

No PC Required!

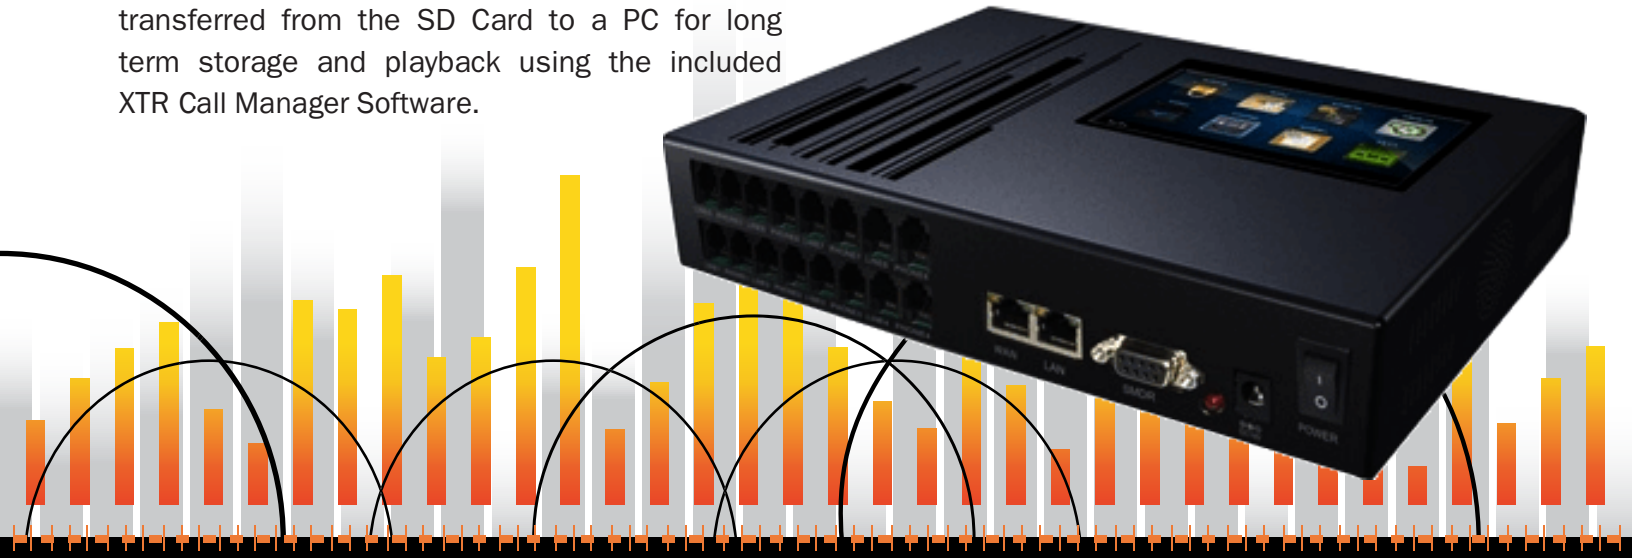

The Call Tracker from Intelligent Recording provides a compact, stand-alone Call Recording solution for those wanting full-time recording on up to 8 lines without the need for a host PC. It's the perfect solution for a single location business or for multi-location businesses wanting to record branch locations, yet store and manage calls centrally when used with the optional Call Tracker Network Server Synch Software.

In **Stand-Alone Mode** the Call Tracker is connected to up to 8 Analog lines and records and stores all calls on the built-in SD card. The device comes standard with an 8 Gb SD card allowing over 500 hours of storage. The calls can be reviewed and played on the Call Tracker or transferred from the SD Card to a PC for long term storage and playback using the included XTR Call Manager Software.

In single-site **Networked Mode** the Call Tracker will record up to 8 Analog lines and record and store the calls on the built-in SD Card. When connected to the customer network via the built-in RJ45 Ethernet port, calls can be reviewed, played and transferred to a PC for long-term storage and playback with the included Call Tracker Management Software.

Setup and programming is simple using the easy to follow touch-screen display programming interface.

For **Multi-Location** companies, the Call Tracker will forward recorded calls to a centralized server location, allowing for centralized playback and management of calls.

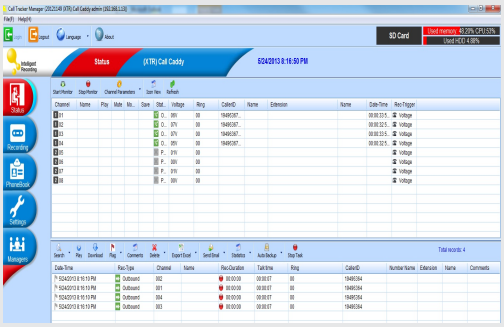

The **leader** in cost-effective **true digital call recording**
