

MAXIMUM MOBILITY FOR GROWING BUSINESSES

THE SUM OF ALL YOUR BUSINESS COMMUNICATIONS

Voice. UC. BYOD. Mobile.

Now you can have it all with the ability to easily migrate from analog to IP for true mobility and more with the Vertical Summit™ unified communications (UC) platform. The versatile Vertical Summit gives you cost-effective options that add up to real-time communications and bottom-line business benefits with an optimized IP/TDM hybrid architecture that supports UC and mobility applications.

Key Features

- Mobile Communicator for Smartphones & Tablets
- Auto Attendant
- Voice Mail
- Email Notification
- Automatic Call Distribution (ACD)
- Deluxe PC Softphone
- IP Attendant for Office
- Mobile & SIP Extensions
- Call Recording
- Green Power Save

Affordable access to applications

In addition to standard call handling features including voice mail, email, call recording, Caller ID and music on hold, the Vertical Summit offers more advanced functions through integrated applications and features such as a multi-level Auto Attendant and voice mail with email notification, including the ability to attach .wav files to emails.

Summit Communicator

Go mobile with single-number connection via SIP-based softphone for seamless communications anywhere

- Tap and swipe access to corporate phone book, call log, paging and other system features
- Call recording to device
- 3-way conference calling
- Send and receive secure text, IM and broadcast messages
- One-touch call transfers
- Available for Android 2.3 and iOS 5.1 and higher

IP Attendant for Office

Streamline call handling and distribution with simplified control of Attendant features and functions

- Displays call, user and system status for faster response to and routing of calls
- High quality voice communication via built-in IP softphone

Summit Wireless DECT System

Cost-effective, secure and reliable wireless solution to easily expand your coverage, voice traffic and number of users

- Expands up to 48 extensions
- Customize by adding base stations (each base supports up to six simultaneous conversations)
- Improve employee productivity, mobility, reaction time and safety

Affordable expandability

Easy to learn and use, the Vertical Summit is ideally suited for five to 50 users. Each basic platform gives you the flexibility to design an affordable, dynamic communications system that's truly the best fit for your business with:

- Advanced VoIP technology
- Low cost SIP trunking
- On/off premise mobility
- Remote connectivity

Easily expand your communications infrastructure as your business grows with the addition of an extra expansion unit for seamless communications for up to 140 users.

The Summit is also compatible with Vertical's SBX IP and MBX IP platforms, so you can quickly network up to 250 sites together while creating a simple migration path to the full-feature and cost-saving benefits of the Summit's built-in VoIP technology.

Vertical Summit Wireless DECT System

Powerful, compact communications – in and out of the office.

With built-in VoIP technologies and advanced pure-IP software, the Vertical Summit is a flexible, cost-effective solution ideally suited for the mobile workplace. Stay connected in and out of the office with the tap of a finger or click of the mouse, and easily expand your communications base as your business grows.

Simple set up

Installation and maintenance are simple with the Web-based Install Wizard, and the Summit's award-winning, stylish design allows for compact communications that fit securely in a standard 19" rack. Save power and money, too. With the Summit's Green Power Save feature, you can automatically or manually disable power to phones connected to the system at night or during holidays for more energy-efficient and cost effective system operation.

Flexible phone options

Get the most out of the Summit's feature set with Vertical's new 9000 Series digital phones and DECT phones featuring display-based interfaces, call logs, self-labeling keys and simplified administration. The Summit also integrates with other SBX IP and MBX IP digital, SIP and IP phones, as well as Vodavi single-line analog, XTS, STS and Triad phones to further extend your current communications capabilities and investment.
