

The Konftel 55 series

– for web and teleconferencing

The Konftel 55 and the Konftel 55W form a series of simple-to-use, versatile conference devices delivering impressive, crystal-clear sound thanks to the patented OmniSound® HD audio technology.

The Konftel 55 series has been specially designed to be the hub of your communications. Connect your computer, cellular phone/tablet and deskphone for effortless meetings with superior audio quality whatever the communication tools. Moreover, VoIP calls can be bridged with calls via a desktop or cellular phone. Switch easily on the smart LCD color screen that only displays the current connections.

The Konftel 55 series has recording capability. Calls and dictations recorded on the memory card can be played back, saved or shared. These highly portable units look just as good on the desktop and in the home office as in the conference room. The difference between the models is that the Konftel 55W has Bluetooth and is equipped to accept expansion microphones. It's up to you to choose your favorite.

COMMON FEATURES IN THE KONFTEL 55 SERIES:

- Flexible connectivity options; USB for VoIP calls, deskphones, cellular phone/tablets and headsets
- OmniSound®HD – superior audio quality
- Rechargeable battery
- LCD high-resolution color display
- Switch and combine connections on the LCD display

Desktop phone connection

The Konftel 55/55W integrates with the PBX via a simple connection to the desk-phone headset port.

* TDM and IP deskphone.

OMNISOUND® HD – SUPERIOR AUDIO QUALITY

The patented OmniSound® audio technology guarantees an impressive and crystal-clear **full-duplex** audio, allowing you to speak in two directions for effective participation in virtual meetings. The sound is transmitted clearly and powerfully to all attendees thanks to a hypersensitive microphone with 360° audio pick-up and speakers.

OmniSound® HD delivers HD audio during VoIP calls. It also incorporates **automatic echo cancellation** and **noise suppression**, which minimizes background noise interference, and an **equalizer** for personal adaptation of the audio properties.

This means you can move about freely in the room, talking, discussing and debating with others without any loss of audio quality and without any annoying sound clipping, damping or echoes. It's as close to real sound as you can get.
