

# Ladder Rack Runway Cable Radius Drop

## Fullerton, California

We are pleased to announce the new [Ladder Rack Runway Cable Radius Drop](#).

This radius drop can be easily attached to either ladder rung or side rail for parallel or perpendicular cable drops. With a 4.5 inch bend radius, it maintains the proper bend radius for copper or fiber optic cables according to TIA specifications. There is no lose accessory, simply attach and tighten one screw and it is secured.

The Cable Radius Drop works with all ICC [ladder racks](#) and it comes in a 2-Pack ValuePack.

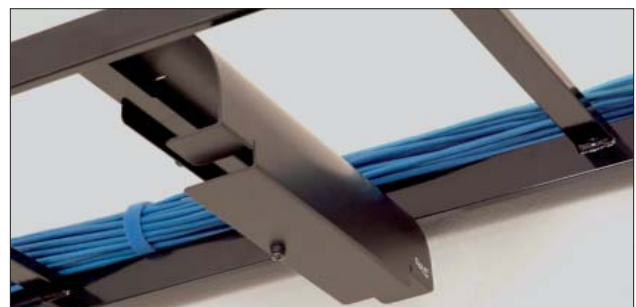

## About ICC

ICC is a leading manufacturer of commercial and residential structured cabling products governed by strict ISO 9001:2008 standards. With over 30 years of innovation, ICC products have established a reputation for premium quality, proven performance and competitive prices supporting voice, data, audio, video and fiber optic connectivity.
